

how to: Add a letter with an accent

If you would like to add letter with an accent for example è to your text, you will need to go into the HTML code.

Method for sub-script:

1. Go to Panel View
2. Click on panel view to open the HTML code. You should see something like this:

```
Source Code
<P>How to: Add a letter with an accent</P>
```

3. Find the content you want to add the letter with an accent to in the HTML code.
4. Apply the following code in place of the letter in your word:

á for á
é for è
í for ì
ó for ò
ú for ù

You can use this for any letter using &*acute where * is the letter you want with the accent
