

how to: Change the colour of your bullet points

If you would like to change the colour of your bullet points, you will need to go into the HTML code.

Method for sub-script:

1. Go to Panel View
2. Click on panel view to open the HTML code. You should see something like this:

```
Source Code
<P>How to: Change the colour of your bullet points</P>
```

3. Find the content you want to apply the bullet colour to.
4. Apply the following code around the content as show below. You will need to substitute the Hex value #C0C0C0 for the Hex value of the colour you wan the bullet to be:

```
<UL style="COLOR:#C0C0C0">
```

A list of web safe hex values for colours can be found here: http://www.w3schools.com/Html/html_colors.asp
